

Instruments for Sterilization

WASH-TRAY™

With the RØNVIG Wash Tray System™ instruments are safely fixed and organized from chairside through cleaning/disinfection, sterilization and back to chairside.

The RØNVIG Wash Tray System™ is developed to fit dental dishwashers and autoclaves meeting standard tray dimensions.

Minimum handling

- Hygienic and safe
 - reduces the risk of cross-contamination
- Protects instruments thus prolonging their lifetime
- Tray sizes slightly under norm dimensions - compatible with standard container and cassette-systems

Material:

Made from high-grade, acid resistant stainless steel and heat-resistant silicone rubber.

1/1 Tray (275 x 180 mm).

1/2 Tray (131 x 180 mm).

1/4 Tray (73 x 180 mm).
